Adverse Reaction Reporting Form

For reporting infant reactions to formula with Martek’s algal DHA/fungal ARA

If your baby experienced adverse reactions—such as diarrhea, vomiting or other gastrointestinal problems—from consuming formula with DHA/ARA and you have reason to believe that DHA/ARA contributed to the problem, we urge you to submit an adverse reaction report with the FDA Medwatch program (Go to https://www.accessdata.fda.gov/scripts/medwatch/medwatch-online.htm to submit online).

To help us document these adverse reactions, please send a copy of your report to The Cornucopia Institute by emailing cultivate@cornucopia.org.

For your convenience and to help The Cornucopia Institute document these reactions, you may use the form below. Please note that all questions are voluntary and all answers will be held in strict confidence. Personal information will never be sold or shared, and we will use your contact information only to contact you in case we have additional questions.

Formula (name and type) to which baby reacted:
Symptoms experienced by baby:

Did baby require hospitalization due to these symptoms?

How long did these symptoms last?

What do you believe caused your baby’s symptoms?

Do you have reason to believe that Martek’s algal DHA/ fungal ARA were the cause of these symptoms?

If yes, please explain (for example: “symptoms disappeared when we switched to a similar formula without DHA/ARA”):

Did your baby ever find relief from these symptoms while on formula? If yes, please explain. If your baby tolerated a different type of formula, please specify the name and type of this formula.

Would you be willing to share your story with others (for example, as a testimony on our website or in a newspaper article)?
