The GMO Divide — Let’s All Reward the True Organic Heroes.

More than 60 countries around the world require GMO labeling or ban GMOs outright — but not the U.S., Democratic and Republican administrations, and Congress, have repeatedly ignored the overwhelming majority of Americans who favor labeling GMO foods in the marketplace. Our politicians seem to be listening to the corporate executives (their donors) instead of the citizenry. In Washington State, corporate interests spent more than $52 million to narrowly defeat I-522, which would have mandated labeling of foods containing GMO ingredients. This is the largest amount of money ever spent during an initiative campaign in the state’s history. After narrowly losing a similar fight in California (Proposition 37) in 2012, when corporate agribusiness spent $46 million on misleading advertisements, consumers need to vote in the marketplace and stand with the brands supporting “the right to know” what’s in our food.
